

# UNIFORM CARE INSTRUCTIONS

1. Do not put these uniforms in the dryer. They will spin almost dry and heat bakes in stains.
2. Pretreat all stains with a quality spot treatment. Resolve Stain Treatment works great. You can also use Shout Out and Iron Out with good results.
3. If you don't have a pretreat solution you can wet the uniform completely and rub your laundry detergent into the stain.
4. A double wash cycle should be used for best result. Or if your washer does not have that option wash once RE- treat the stain and wash again.
5. Do not let stains set in overnight. This is as bad as putting the uniform in the dryer.
6. Again DO NOT dry the uniforms.

We appreciate all the parents support and efforts with regard to our program. Uniform maintenance just like any other piece of equipment requires a little extra care and attention. Please help us maintain this specialty equipment apparel item so that they will provide years of service to our program as they were designed.
